

TECHNICAL SEO AUDIT

Tazminat Hesaplama

K1dem · Ohbar · Tazminat Hesaplama Platformu

Site URL: <https://k1demtazminat1hesaplama.tr>

Audit Date: 11 June 2026

Framework: Next.js 16 (App Router) · React · Turkish (tr)

Method: Read-only codebase analysis

55%

Overall Compliance Score

48 passing · 39 gaps · 87 checklist items

PASS: 48

GAPS: 39

This report reflects implementation status found in source code at audit time.

No live crawl or Rich Results Test validation was performed.

1. Executive Summary

Tazminat Hesaplama is a Next.js compensation calculator with four indexable content routes and six supporting trust/legal pages (noindex). The site demonstrates strong foundations in structured data (FAQ, WebApplication, Article, Speakable), internal topic clustering, and Turkish-language content depth.

The audit evaluated 87 checklist items across 11 categories (A–K). 48 items pass (55%), while 39 items require attention — primarily meta tag length optimization, mobile calculator placement, image ALT coverage, and AEO content formatting.

Highest-impact gaps: meta descriptions exceed 160 characters on all indexable pages; the calculator requires scrolling past the hero on mobile; homepage lacks breadcrumb schema; several carousel images lack ALT text.

1.1 Category Scorecard

A. Title Tag & Meta	3'	3'		50%
B. Heading Structure	4'	2'		67%
C. URL Structure	4'	1'		80%
D. Content Quality	4'	6'		40%
E. Image Optimization	3'	5'		38%
F. Internal Linking	6'	4'		60%
G. Schema Markup	5'	3'		63%
H. Canonical & Duplicates	4'	1'		80%
I. E-E-A-T & Trust	4'	2'		67%
J. User Experience	4'	4'		50%
K. AEO / GEO Optimization	7'	8'		47%

2. Audit Scope & Methodology

Scope: Full read-only analysis of src/app routes, components, config, public assets, next.config.js, sitemap.js, robots.js, and SEO utilities.

Method: Static code review against a 87-point SEO checklist (Title/Meta, Headings, URLs, Content, Images, Links, Schema, Canonical, E-E-A-T, UX, AEO/GEO).

Limitations: No live HTTP crawl, no Google Rich Results Test, no SERP benchmarking, no keyword density measurement, no CLS/Lighthouse runtime tests.

Post-audit note: Unused social links and dead link components were removed from codebase after initial audit.

2.1 Indexable Pages

URL	Title Chars	Desc Chars	Status
/	61	170	Review
/tazminat-hesaplama/	54	151	OK
/ihbar-tazminati-nedir/	64	166	Review
/kidem-tazminati-tavani/	62	171	Review

2.2 Supporting Pages (noindex)

/hakkimizda/ /iletisim/ /yazar/ /gizlilik-politikasi/ /kullanim-sartlari/ /yasal-uyari/

A. Title Tag & Meta3 Pass · 3 Gaps

Passing

- A3**Unique title tags per indexable page
src/config/site.js
- A5**Unique meta descriptions per route
buildPageMetadata() in each page.js
- A6**Keyword variation in descriptions
HOME, TAZMINAT, IHBAR, TAVAN SEO blocks

Gaps / Action Required

- A1**Primary keyword at title start
TAZMINAT title starts lowercase; HOME keyword after pipe
- A2**Title length 50–60 chars
HOME 61, IHBAR 64, TAVAN 62 characters
- A4**Meta description 140–160 chars
All indexable pages: 151–171 characters

B. Heading Structure4 Pass · 2 Gaps

Passing

- B1**One H1 per page with primary keyword
CompensationCalculator.js, guide shells
- B3**H2 subtopic coverage
12+ H2s on home; SectionHeading on guides
- B5**Primary keyword in H2
K1dem Tazminat1 Hesaplay1c1s1, Nas1l Hesaplan1r
- B6**Logical hierarchy H2! H3! H4
Calculator results block

Gaps / Action Required

- B2**H1 aligned with title tag
/tazminat-hesaplama H1 " title topic
- B4**H3–H6 for nested detail only
Footer h4 panels; result card h4 labels

C. URL Structure4 Pass · 1 Gaps

Passing

- C1** Keyword-rich clean URLs
/tazminat-hesaplama, /kidem-tazminati-tavani
- C2** Lowercase hyphenated URLs
next.config.js trailingSlash
- C4** Consistent URL pattern
Static App Router slugs
- C5** No dynamic indexable URLs
sitemap.js — 4 static routes

Gaps / Action Required

- C3** Short URLs, no stop words
/ihbar-tazminati-nedir contains nedir

D. Content Quality

4 Pass · 6 Gaps

Passing

- D1 Keyword in first 100 words**
hero-copy, CompensationCalculator.js
- D4 Matches search intent**
Calculator + rehber content
- D7 FAQ sections present**
Home 12 Qs; GuideFaqSection on guides
- D10 Bold for answer emphasis**
GuideBlocks.js table highlights

Gaps / Action Required

- D2 Keyword density 1–2%**
Not measured in codebase
- D3 LSI keywords throughout**
Partial; English fragments in tavan content
- D5 Word count vs SERP average**
Not benchmarked
- D6 Original non-filler content**
Cannot verify from code audit
- D8 Answer-first per H2**
Many sections open with context
- D9 Content date-stamped**
No visible last-updated date

E. Image Optimization

3 Pass · 5 Gaps

Passing

E1 **WEBP format for content images**
public/images/**/*.*.webp

E5 **Descriptive file names**
intro-severance-bg.webp, etc.

E7 **OG image 1200×630**
og-image.webp verified

Gaps / Action Required

E2 **Compression <100KB**
logo.webp 99KB, guide-steps-office 98KB

E3 **ALT on all images**
HowStepsCarousel steps 2,4,5 missing imageAlt

E4 **Natural ALT text**
Some long keyword-heavy alts

E6 **Lazy load below-fold**
Many below-fold images use priority

E8 **No image-only text**
Hero carousel carries messaging role

F. Internal Linking

6 Pass · 4 Gaps

Passing

F1 No orphan pages
Footer + Navbar link all routes

F2 Calculator linked from home
`CalcCta!` #hesapla

F4 Descriptive anchor text
internalLinks.js — no click here

F6 Topic cluster inter-linking
linkInternalTerms.jsx

F8 Direct 301 redirects
next.config.js legacy paths

F9 Links per page <150
Within safe limits

Gaps / Action Required

F3 Links in first 3–4 paragraphs
Home hero CTA only at top

F5 Exact-match anchor overuse
`Repeated k1dem/ihbar anchors`

F7 No broken links
Runtime 404s not verified in audit

F10 Related tools at page bottom
Components removed; not rendered on guides

G. Schema Markup5 Pass · 3 Gaps

Passing

- G1

FAQ schema on FAQ pages
FAQPage JSON-LD home + guides
- G3

WebApplication on tool page
src/app/page.js
- G4

Organization on homepage
buildOrganizationSchema()
- G5

Article on guide pages
3 guide page.js files
- G7

No conflicting schema types
Separate JSON-LD blocks

Gaps / Action Required

- G2

Breadcrumb schema sitewide
Homepage lacks BreadcrumbSchema
- G6

Video schema
No video embeds
- G8

Schema validated (Rich Results)
No validation evidence in repo

H. Canonical & Duplicates

4 Pass · 1 Gaps

Passing

- H1** Self-referencing canonical
buildPageMetadata() alternates.canonical
- H3** No AMP/mobile duplicate
Single responsive site
- H4** Unique meta per page
Per-route metadata exports
- H5** Thin pages noindexed
ROBOTS_NOINDEX_FOLLOW on trust pages

Gaps / Action Required

- H2** Pagination canonical
N/A — no pagination

I. E-E-A-T & Trust4 Pass · 2 Gaps

Passing

I2	About Us page /hakkimizda/
I3	Privacy & Terms in footer LEGAL_NAV
I4	Authoritative citations mevzuat.gov.tr, resmigazete.gov.tr
I6	Contact with email iletisim/page.js

Gaps / Action Required

I1	Author on all content pages Author only on /yazar (noindex)
I5	Statistics freshness Mixed 2025/2026 data; no refresh date

J. User Experience4 Pass · 4 Gaps

Passing

- J3**Clear descriptive CTAs
CalcCta: Hesapla, ^imdi Hesapla
- J4**"d 3 clicks to any page
Flat nav + footer
- J5**Lists for scannable content
Guides, FAQ, bullet lists
- J7**Multimedia adds value
Carousel, illustrations, 3D scenes

Gaps / Action Required

- J1**TOC for long pages
TableOfContents removed (unused)
- J2**Calculator above fold
Hero section precedes #hesapla
- J6**CLS = 0 on results
Dynamic results; no CLS measurement
- J8**Social sharing on pillar pages
ShareBar removed (unused)

K. AEO / GEO Optimization

7 Pass · 8 Gaps

Passing

- K1** Direct answer near top
hero-copy intro
- K2** What is [topic] section
0_ten_Ç1karma_Tazminat1_Nedir?
- K4** HowTo / step-by-step
HowStepsCarousel, StepsShowcase
- K5** Speakable schema
SPEAKABLE_SELECTORS + buildSpeakableSchema
- K7** Tabular data
SeveranceBreakdownTable, guide tables
- K9** Result explanations
result-note, eligNote messages
- K10** Citation-friendly phrasing
0_Kanunu_4857_references

Gaps / Action Required

- K3** Natural FAQ phrasing
Guide FAQs use S1/S2 prefixes
- K6** Self-contained H2 sections
Long multi-topic blocks
- K8** Key Takeaways near top
Özet section at page bottom
- K11** Wikipedia/Wikidata presence
Not evidenced
- K12** Brand + tool off-site pairing
Not verifiable from code
- K13** Avoid hedging language
genellikle, ço u durumda used
- K14** AI citation testing
No test artifacts
- K15** Indexable static result pages
Results client-side only

3. Priority Recommendations

The following prioritization helps focus development effort on items with the highest SEO and user-impact return. Items are ordered by expected ranking, crawl, and conversion impact.

P1 — Critical

Meta title/description lengths (A2, A4); calculator above fold (J2); homepage breadcrumb schema (G2)

P2 — High

Missing image ALT (E3); lazy-load below-fold (E6); author byline on guides (I1); FAQ natural phrasing (K3)

P3 — Medium

H1/title alignment (B2); content date stamps (D9); related tools footer (F10); Key Takeaways position (K8)

P4 — Low

Wikipedia presence (K11); AI citation tests (K14); video schema (G6); TOC for long pages (J1)

3.1 Quick Wins (< 1 day)

- Trim meta descriptions to 140–160 characters on all 4 indexable pages (site.js)
- Shorten title tags to 50–60 chars; capitalize TAZMINAT_PAGE_SEO title
- Add imageAlt for HowStepsCarousel steps 2, 4, 5
- Remove priority flag from below-fold images; enable lazy loading
- Add BreadcrumbSchema to homepage (src/app/page.js)

3.2 Strategic Improvements (1–2 weeks)

- Move calculator (#hesapla) above fold on mobile or add sticky CTA
- Add author byline / Evren Maz1 attribution on guide pages
- Rewrite guide FAQ questions to natural PAA phrasing (remove S1/S2 prefixes)
- Add visible last-updated date on content pages and sitemap lastModified
- Compress images >95KB; remove unused logo.jpeg duplicate
- Re-introduce related-tools footer on guide pages with valid internal links

4. Structured Data Inventory

Page	Schema Types	Status
Homepage /	Organization, WebApplication, Speakable, FAQPage	Active
/tazminat-hesaplama/	Article, Speakable, FAQPage, BreadcrumbList	Active
/ihbar-tazminati-nedir/	Article, Speakable, FAQPage, BreadcrumbList	Active
/kidem-tazminati-tavani/	Article, Speakable, FAQPage, BreadcrumbList	Active
Legal / About / Contact	BreadcrumbList, Speakable	Active (noindex)
/yazar/	ProfilePage, Person, Speakable	Active (noindex)
Sitewide	VideoObject	Missing

5. Conclusion

Tazminat Hesaplama achieves a 55% compliance rate against the audited checklist, with particular strength in schema markup, internal linking architecture, FAQ coverage, and Turkish-language content depth.

The platform is well-positioned for organic search in the k1dem tazminat1 n mobile calculator visibility, and image accessibility will yield the fastest measurable SEO improvements.

A follow-up audit after implementing P1 and P2 recommendations should include live Rich Results Test validation, Lighthouse CLS measurement, and SERP word-count benchmarking.
